NorComp Kobe Steel Non-Use Statement

NorComp is fully aware of the Kobe Steel (KOBELCO) announcement of October 2017 advising that certain materials are non-compliant in meeting product specifications. The materials listed by Kobe Steel include Aluminum, Copper, Stainless Steel Wire, Steel Powder, Special Steel, Sputtering Target Material, Steel Wires and Spring Wires. These materials were utilized by a number of Kobe Steel companies.

In reviewing our supply chain NorComp determined we have no knowledge that Kobe Steel materials are utilized in any of NorComp's products.

We will continue to monitor this situation and advise if there is any change which would impact this non-use of Kobe Steel statement.
