# ≡M SERIES
# M12 X-CODE CIRCULARS

*IP67/68 Performance - Industrial Gigabit Ethernet*

The newly released NorComp X-Coded M SERIES Circular connectors are designed to run high speed Ethernet through a ruggedized IP68 M12 solution. The separated twisted pairs allow for the running of high speed Ethernet up to 10Gbs which is used in industrial networking applications and ruggedized applications requiring higher bandwidth.

## FEATURES & BENEFITS

- Superior signal integrity for high-speed Ethernet data transfers
- Handles high bandwidth files and minimizes transfer time
- Increased throughput and efficiency in high-end systems and applications
- Increased isolation against cross talk
- Reliably operates in temperatures ranging from -40° to +85 °C

## NORCOMP
